

Knebworth and Marymead Medical Practice

If you care about what happens at your GP surgery and want to know more about the exciting developments in patient care which benefit people every single day, all you need to do is join one of the patient group meetings.

The **Patient Participation Group** are volunteers who both represent patients and support the practice with all kinds of different work - you might have met some of us at HYTH (Help Yourself to Health), on the health walks or raising money at local fetes.

We also run the Knebworth and Marymead Facebook group (a closed group of nearly 500 patients which you can join under groups: "Knebworth and Marymead Medical Practice").

We meet each month to discuss a range of topics, and would love more patients to join in. We're now holding the meetings on the **Zoom** video platform, so it is now easier than ever to take part - you can just listen and watch from the comfort of your own home, and ask questions and suggest ideas.

To give you some idea of the topics we cover, we have recently discussed **eConsult** which helps people send information about their medical concerns online to their GP, the work of the **local mental health services** provider Hertfordshire Partnership Foundation Trust, how to get **younger people** involved, and much more.

Nurse Wendy will be the Speaker at our next meeting, dealing with topics of special interest to young adults and parents.

Tuesday December 15th from 7 pm – 8.30 pm

If you would like details of our meeting please contact one of the PPG Officers.

We're looking forward to seeing you!
